

## A&P Flooring System®

### Modular Exhibit Flooring Display System

The A&P Flooring System is an extremely strong, modular raised flooring system that is easy to install and customize! A&P features 1 meter x 1 meter panels that simply slide into place on a durable anodized aluminum frame, allowing you to easily create an exhibit floor in the size you need. And because the A&P Flooring System is so strong, it's perfect for heavy loads like cars and trucks.

- Simple installation – assemble frame to size needed and slide panels into place
- High load capacity – holds up to 3.5 tons per square meter
- Install to the size you need – get multiple options from one investment
- Custom finishes available for surface panels – laminate, wood and more
- Raised for convenient utility management
- Adjustable height – can be leveled after panels are in place
- Vertical fixation possible in every joint
- Designed for indoor and outdoor use
- Durable and reusable
- Compact and easy to transport and store
- 1 meter x 1 meter tiles are 1" thick
- Available for rental or purchase

The modular design of the A&P Flooring System allows it easily adapt to your changing exhibit needs!
